Hungry for knowledge, adaptable, and self-sufficient. I love teaching myself useful and interesting things, and I'm always thrilled to learn and understand the world a bit more.

Open to any technologies, technical challenges and roles in other areas of development, but mainly looking for remote web developer roles.

Skills

JavaScript   C Sharp   HTML5   Node.js   Tailwind   MySQL   Linux

TypeScript   Rust   CSS3   React   Sass   MongoDB   Git

Languages

- English, C1 Cambridge Certified.
- Spanish, native.

Technical Projects

- Personal website using Next.js framework (React) and Sass for CSS deployed on Cloudflare Pages & Vercel.
- To-do app, for learning purposes, built using the MERN stack, uses Zod and Swagger.
- E-commerce as course's last year final group project. Uses LAMP stack, no libraries or frameworks. Although I was not the main programmer, I mostly fixed the worst bugs and assisted him.
- WebAPIs using ASP.NET MVC (C#) for learning purposes.

Education

[Completed]

UTU – EMT Informática – Énfasis desarrollo web.
Similar to high school diploma, web development oriented.

Extra

I like languages (currently learning Japanese and Italian). I like music and play guitar. Interested in technical aspect of game development and game engines implementation and features (Currently learning Rust's Bevy, briefly used Unity).
