Hungry for knowledge, highly adaptable and confident in success given the necessary time and resources.

Looking experience in the field, although mainly applying for web development roles, I'm open to any technical challenges in other areas, I'd be thrilled to learn anything.

Skills

JavaScript   C Sharp   HTML5   Node.js   Tailwind   MySQL   Linux

TypeScript   Rust   CSS3   React   Sass   MongoDB   Git

Languages

- English, C1 Cambridge Certified.
- Spanish, native.

Technical Projects

- Personal website using Next.js framework (React) and Sass for CSS deployed on Vercel.
- To-do app, for learning purposes, built using the MERN stack, uses Zod and Swagger.
- E-commerce as final group project for high school course. Uses LAMP stack, with no libraries or frameworks. I was not the main developer, I just fixed the worst bugs.
- WebAPIs using ASP.NET (C#) for learning purposes.

Education

[Completed]

UTU – EMT Informática – Énfasis desarrollo web.
   Similar to high school diploma, web development oriented.

Extra

I like languages (currently learning Japanese and Italian). I like music and play guitar. Interested in game development, especially the technical aspect, like features of games and game engines and their implementation.
